SUMMARY

Computer Science graduate with hands-on experience in Python, Java, Object Oriented Programming and SQL with knowledge of application development, database management and debugging. Seeking an entry-level opportunity to contribute to software development while strengthening expertise in full-stack technologies and SDLC practices.

EDUCATION

Bachelor of Technology in Computer Science and Engineering 2022—2026
Kalasalingam Academy of Research and Education, Tamil Nadu CGPA: 8.25/10

Class XII 2020—2022
Narayana Junior College, Andhra Pradesh Percentage: 84.20/100

Class X 2019—2020
Swamy Vivekananda E.M High School, Andhra Pradesh Percentage: 99.33/100

TECHNICAL SKILLS

Programming Languages: Java, Python
Software Engineering: Software Development Life Cycle, Agile Methodologies, Debugging
Frameworks: Flask, Spring Boot, Spring MVC, REST APIs, Microservice
Web Technologies: HTML, CSS, JavaScript, ReactJS
Version Control/Tools: Git, GitHub, Visual Studio Code
Databases: SQL, PostgreSQL, MySQL, Relational Database Management Systems
Soft Skills: Problem-Solving, Analytical Thinking, Team Work, Communication

PROJECTS

Book My Doctor GitHub

- Developed a Doctor Appointment Booking Platform with 100% role-based access control supporting 3 user roles (Admin, Doctor, Patient) and managing end-to-end hospital appointment workflows.
- Implemented appointment scheduling with shift categories, token-based slot allocation, consultation lifecycle tracking and prescription management to streamline patient booking and clinical operations.
- Designed a scalable modular architecture with 3 features environment-based configuration, database migrations, and responsive dashboard analytics.
- Technologies Used: Python, HTML, CSS, Flask, REST APIs, PostgreSQL, Git, GitHub

E-Commerce Platform GitHub

- Developed a scalable E-Commerce Management System using Java, Spring Boot and implemented 15+ REST APIs for product/category management, search, filtering, validation, and exception handling.
- Implemented a layered backend architecture with 5+ core modules such as product, category, user authentication, cart and order management with DTO-based API design, transaction management, and role-based access control planned for secure and maintainable development.
- Technologies Used: Java, ReactJS, Spring MVC, Spring Boot, REST APIs, MySQL

CERTIFICATIONS

- Full Stack Python Development Building Real World Applications— **UDEMY** Certificate
- SQL for Data Analysis— **Simplilearn** Certificate
- Database Management Systems— **Code Chef** Certificate
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate— **Oracle** Certificate

PUBLICATIONS

- Published an IEEE research paper titled “Smart College Helpdesk Assistant using Machine Learning” at 8th International Conference on Intelligent Sustainable Systems— **ICISS 2026** Certificate
- Finalist in Expert Labs National Hackathon 2025— **IBM** Certificate
